## Cost Effectiveness of Retrofits

We are always looking for the simple "quick and easy" solution. This is natural, and when the solution proves effective, it's a win:win. But, when the solution is not effective, more effort is warranted. A few months ago, a customer approached the Lighting Design Lab (LDL) about a lighting upgrade for an industrial facility. They were planning to use a popular brand of screw-in LED lamp, a so called "HID retrofit". This would have allowed the customer to keep the existing fixtures; this appeared to be a relatively easy solution. But was it? [MORE](#)
